Dear Sir:

In response to the March 23, 2001, office action, please amend the above-identified application as indicated below.

In the Claims:

Please cancel claims ~~8~~ 9 and ~~41~~ without prejudice and amend claim 1 as follows.

1. (Twice Amended) A combinatorial library which exists at equilibrium in an aqueous solution or suspension including one or more metal atoms or metal ions and a group of three or more non-biopolymer ligands each of which comprises (i) at least one functional group capable of bonding to the metal atom or metal ion and (ii) a recognition element capable of binding a biological receptor, the combinatorial library comprising:

a plurality of at least six different complexes in the aqueous solution or suspension, each of the plurality of at least six different complexes being formed of a metal atom or metal ion and at least two non-biopolymer ligands, wherein each of the at least two non-biopolymer ligands is reversibly bonded through the at least one functional group thereof to the metal atom or metal ion by a labile coordinate bond and wherein each different complex in said library has different ligands bonded to the metal atom or metal ion.
